Family Tree Maker™

The best way to organize your family information

For Windows

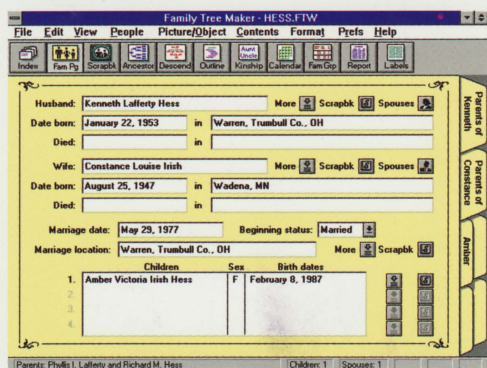

Copies Sold 350,000

#1 Selling and Best Value

Easy-to-use and modestly priced, yet a comprehensive program you won't outgrow. Quite simply, Family Tree Maker™ is the best value you'll find. Here's why:

Easiest to Use

Once you have entered a few names, a mouse click allows you to view and print family trees, birthday calendars, mailing labels, and much more.

Easy to get started — simply enter names and basic facts about parents and children into the Family Page.

Family Tree Maker saves time, too:

- Automatically memorizes repeated facts, such as city names, and fills them in as you type.
- Instantly finds any person or fact when you type a single word.

Organizes Everything

Enter up to **two million** relatives. And there's no limit to what you can record for each person:

- Store basic facts in the Family Page. It even handles multiple marriages and non-traditional families.
- Organize **dozens** of additional facts about each person in the More About Pages. Record education, hobbies, medical history, and more.
- Include photos in each person's Scrapbook.
- Record heart-warming family stories in the 15 pages of free-form notes per person.

Attention Advanced Users:

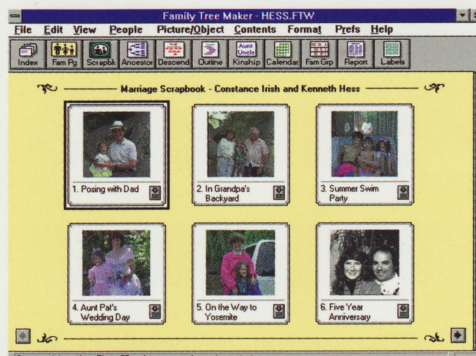

Family Tree Maker is incredibly easy-to-use, but it's also state-of-the-art. You can do all of this:

- Multimedia slide shows right on your computer screen!
- Import graphic files (BMPs, TIFs, etc.) such as scanned photos or newspaper clippings.
- Embed OLE objects such as home video and audio clips.
- Crop, flip, and rotate photos and graphic files.
- Auto JPEG compression saves disk space.
- Read files from all previous versions of Family Tree Maker.
- Import and export GEDCOM files.

Easily Include Photos — No Scanner Required!

Family Tree Maker isn't just for family trees anymore. It's also a great way to get all those cherished family photos organized!

- Ask your photo developer to put your next roll of film onto a **Kodak Photo CD™**. Even old photos can be put onto a Photo CD™.
- Slip the Photo CD™ into your CD-ROM drive to put pictures into Family Tree Maker.

Store thousands of photos in each person's "Scrapbook". Enter descriptions for easy searching and sorting.

Largest Variety of Trees and Reports

Your family trees and reports will be rewarding and enlightening. And what a wonderful way to pass your family heritage on to your children!

- **Ancestor and Descendant Trees** print in 10 styles with your choice of facts.
- **Kinship Report** automatically calculates all relationships in your family — solve that "first cousin, twice removed" mystery!
- **Scrapbook Pages** print in a variety of photo album layouts.
- **Hundreds of Reports** including medical history, longevity, and more. Since *you* select the facts to cover in each column-style report, you can create an UNLIMITED number.
- **Family Group Sheets and Individual Fact Sheets** give details on a person or a family.
- **Birthday and Anniversary Calendars**
- **Mailing Labels, Cards, and Name Tags**
- **Family Books** are easy to assemble using the "batch" print feature.

Satisfaction Guaranteed

- **30-day, money-back guarantee** — No questions asked. We stand behind Family Tree Maker.
- **Comprehensive manual includes listings of national** genealogy resources and advice on how to research your family.
- **Free telephone support** — Call 510-794-6850.

"In keeping with its high standards, Banner Blue has produced another piece of excellent software with a manual to match."

-J.P. O'Connor, *Genealogical Computing*, June 1994.
