And for variety and quality, *Family Tree Maker's* printouts are unsurpassed.

Family Tree Maker is the only program that **saves you time** by actually helping you **find your ancestors**. Its "FamilyFinder Index" gives you an amazing headstart by listing more than 115 million people whose names appear in centuries of historical records. Significant sources include State Marriage and Land Records, Social Security, Death Benefits Records, the U.S. Census, genealogical collections from around the world, and dozens more.

When you look up an ancestor's name, the FamilyFinder Index tells you exactly where to find more information about that person. This lets you easily **bypass weeks of time-consuming research** and go straight to the historical sources you need. View these sources at a library, or purchase them on individual CD-ROMs for convenient use at home.

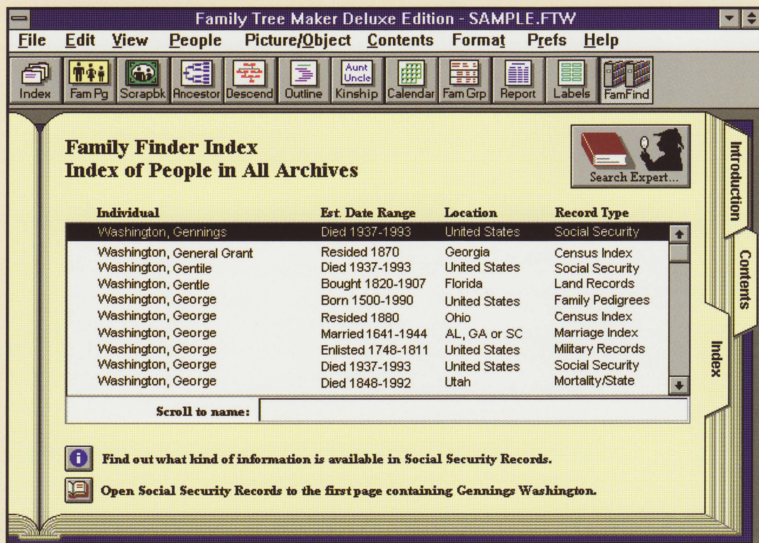

Easy to start — simply use the Family Page to record basic facts about parents and children. Then, click the mouse to view and print family trees, birthday calendars, mailing labels, and much more.

Largest variety of family trees, all perfect for framing

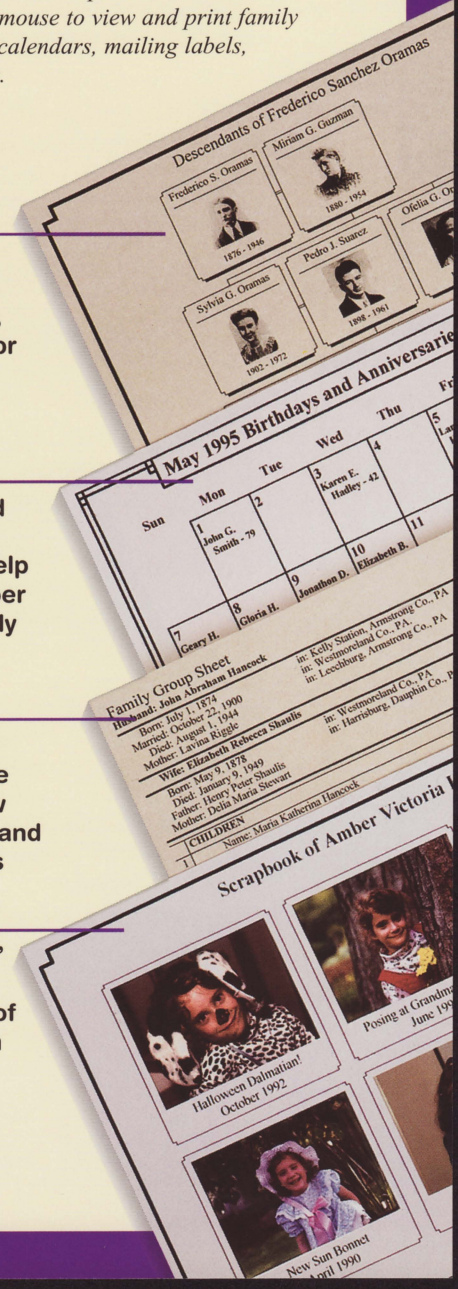

Birthday and anniversary calendars help you remember special family occasions

Hundreds of customizable reports show family facts and relationships

"Scrapbook" pages print in a variety of photo album layouts

All you need to know is a relative's approximate name. FamilyFinder searches for likely matches and then tells you exactly which historical records contain more information about people with that name. Why spend weeks writing letters and visiting libraries to get this information when you can make the same discoveries right from your own desk?
