

Org Plus for Windows

#1 Selling Org Chart Maker

Org Plus® for Windows is for managers, business professionals, and executive assistants who need to create professional-looking organization charts quickly and easily. Automatic chart drawing, custom formatting, compact layouts, and easy editing make Org Plus the fastest way to create the exact chart you need.

Quickly creates organization charts -- no drawing required

Simply select a box tool at the top of the window and click on the chart to add boxes. Unlike drag and drop drawing programs, Org Plus automatically draws and spaces the boxes and precisely lays out the connecting lines. Then type names, titles, and other information into each box. Org Plus automatically expands or shrinks the boxes to fit your text perfectly. You can format the text in almost any conceivable way -- put information on the outside corners of each box, stack it up in columns inside the box, and give it any font, size, or style. And different groups of boxes can have different formats.

Customize your charts

Choose from over 50 different chart, box, and line styles to achieve just the look you want. Org Plus automatically applies your choices to the entire chart or to any set of boxes you select. Select from 70 colors and various shadow styles to create outstanding visual effects. Add your company logo, or type annotations anywhere in the chart. You can even import pictures and clip art into your chart. Org Plus supports the import and export of these standard graphic file formats: .BMP, .PCX, .TIF, and .WMF. A complete set of drawing tools lets you create special effects, such as rectangles and diagonal lines.

Compact charts show lots of information

Users of organization charts want their charts to be as compact as possible -- preferably on one page. Org Plus automatically finds the most compact arrangement of boxes with no performance

penalty. You can use the Make Fit command to apply space-saving changes automatically. Simply tell Org Plus how small you want your chart to be.

Updating charts is a snap

Updating your Org Plus chart is a snap because you make changes directly to the chart. With a few mouse clicks, you can add, insert, delete, or move boxes -- even entire departments. Org Plus does all the redrawing for you.

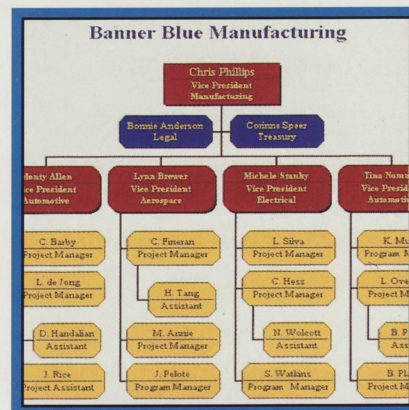

Include Org Plus charts in your other applications

With Org Plus you can cut and paste your organization charts between applications. And now with Object Linking and Embedding (OLE), organization charts can be cut, pasted, and dynamically linked into other Windows OLE client applications, such as WordPerfect for Windows, Word for Windows, and many others. Your chart automatically re-sizes to fit the area of your memo or document. Most importantly, it allows information shared between Org Plus and other Windows applications to be simultaneously updated. And now users of Microsoft® PowerPoint® 4.0 for Windows can import and export Org Plus for Windows files.

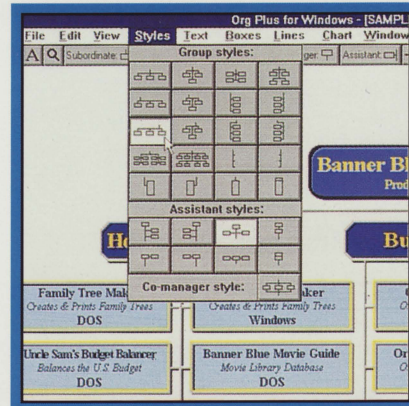

Multi-platform\Server Licenses Available

Concurrent-use, cross platform server licenses are available. Share Org Plus for Windows charts with Org Plus (DOS) and Org Plus for Macintosh users through the (.OPX) file format in either a single user or network environment.
